ABOUT

An ambitious front-end developer with a curious mind and an insatiable desire to learn and evolve.

- Learning and evolving, constantly and fast
- Curious and passionate about web development, frontend and backend.
- Task-first approach, ready to and capable of picking up skills and tools required to achieve the desired results.

PROJECTS

Portfolio Template

[Github](#), [Demo](#)

This is a geeky personal portfolio inspired by Neovim and Gruvbox material. It can be easily customized to fit your narrative.

- 100% self-written, reusable components
- Functional contact form to receive feedbacks
- React hooks (useRef and useEffect) are paired up with intersection observer to achieve the dynamic nav section, reacting to page scroll
- A sprinkle of JavaScript and some dark magic is used for the easter egg animation in the navbar.

Mark-It-Down

[GitHub](#), [Demo](#)

Mark-It-Down allows you to write/edit and preview markdowns in real time. You can also download your content as a markdown file or beautifully formatted pdf.

- Easy to use: edit the preloaded syntax guide or paste in your content to start
- Instant preview of edited content
- Download your content as markdown file or formatted pdf
- Freely adjustable editor size lets you edit your markdown comfortably on any screen.

Session Up

[GitHub](#), [Demo](#)

Session Up helps you ride high on your productivity momentum. Also, it reminds you to take regular breaks to recharge your mind and hydrate your body.

- Intuitive buttons and elegant status prompts help you navigate.
- Real-time at the top left corner to help you stay in contact with reality.
- Clear visual and audio prompts (can be muted) to help you get off/back on track.

Space Tourism Website

[GitHub](#), [Demo](#)

This is a fully responsive website built with a mobile-first approach.

- Client-side routing done with React Router
- Website data fetch asynchronously with React Router hooks
- Communication among components managed with useContext and useEffect

TECH STACK

| HTML | CSS/SCSS | JavaScript/ TypeScript | |
|-------------|----------|------------------------|------|
| Tailwindcss | React | Next | Node |
| Git | pnpm | Vite | |

Exploring into backend

| Node | Next.js | Go | Rust |
|------------|---------|----|------|
| PostgreSQL | MangoDB | | |

Soft Skills

| Eager to learn | Curious |
|--------------------------|-------------|
| Communicative | Cooperative |
| Project-Oriented Mindset | |

EDUCATION

Web Development

freeCodeCamp

📅 12/2022 - 07/2023

- Develop responsive web apps and reusable components using React, SCSS, Tailwindcss, as well as vanilla JavaScript and CSS
- Reflect and improve based on the feedback from the course and online dev community
- check out my certification [here](#).
